

Hydrating facial creams:

Bio-hyaluronic cream

Ultra-rich composition of facial cream "Bio HYALURON" improves skin's elasticity, protects from aging and environmental stress. Hyaluronic acid slows skin's aging processes, eliminates toxins and restores skin's moisture, prevents wrinkles and improves skin regeneration. The cream includes Argan, Evening primrose and Borage oils that enrich the cream with polyunsaturated fatty acids, antioxidants and vitamin E. Bio-Hyaluronic cream is recommended for dry, irritated skin and skin with dilated capillaries.

Moisturising cream

Handmade organic facial cream consists of light textured but rich oils: almond and apricot oils nourish, firm and soften the skin, while macadamia - treats inflammations, removes toxins, smooths wrinkles, restores skin's elasticity. Lavender hydrolat calms the skin, while rose, helichrysum and other essential oils enrich the cream with pleasant smell and its rejuvenating properties. Helichrysum essential oil is also a powerful antioxidant that fights free radicals, protects the skin's protective layer and fights with premature aging. The cream is recommended for dehydrated skin.

Moisturising aloe serum

Serum moisturizes the skin but does not leave the feeling of fat. It tightens the skin, softens acne and dermatitis symptoms, calms irritated skin and is recommended for men after shaving. Hyaluronic acid strengthens the moisturizing effect of the serum and smooth wrinkles.

Aloe vera gel (natural)

Aloe Vera contains more than 200 naturally formed minerals, vitamins, 80% of gel contains water. For this reason, Aloe Vera naturally and intensively moisturizes skin. Also, it helps to soothe damaged skin, treat wounds, acne, protect skin from bacteria, increase skin's elasticity and tighten pores. Aloe vera gel especially recommended for combination or oily skin. If used for dry skin, facial cream afterwards is essential.

Aloe vera products are recommended to be used between skin cleaning with floral water (hydrolate) and facial cream.

Matching facial cleansers, mists

(hydrolats):

All hydrolates are suitable.
