

L2008UF - Crafted to Perfection Mini Log Periodic Antenna

After gathering all of your comments and remarks

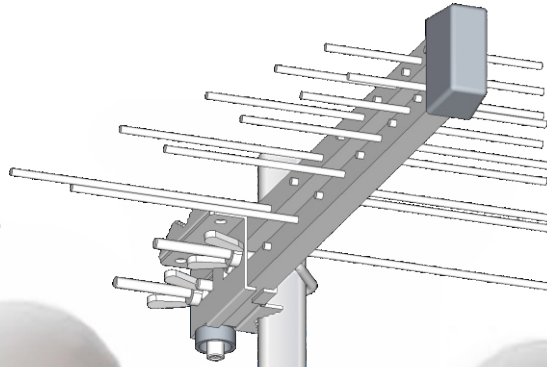

Unispectra presents

this new, crafted to perfection mini antenna -
one of the most popular antennas in the Europe!

- Absolutely universal and suitable for Vertical or Horizontal polarisations.
- Flat gain through the entire band.
- HDTV ready.

- Super compact in length only 40cm. Ideal for lofts or areas with limited space.
- Sturdy and solid design, with no assembly required.

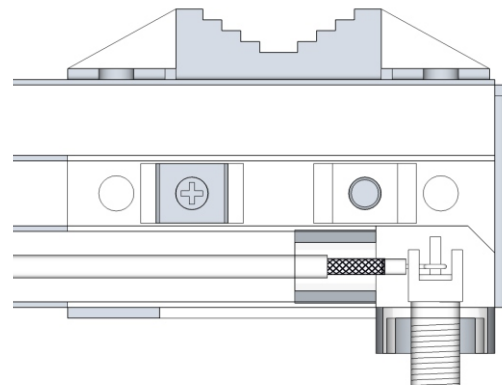

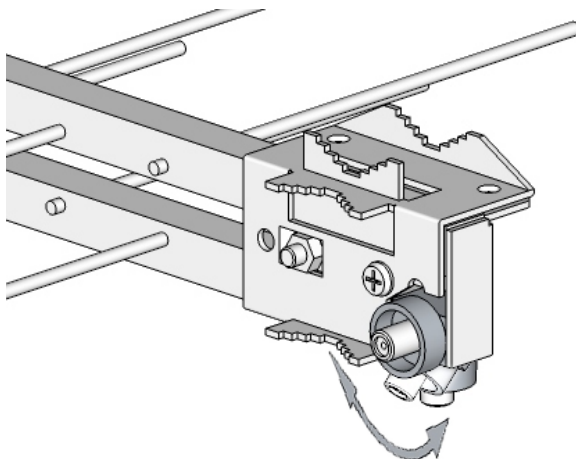

Same look but with new Crucial Features

Quality

Weatherproof

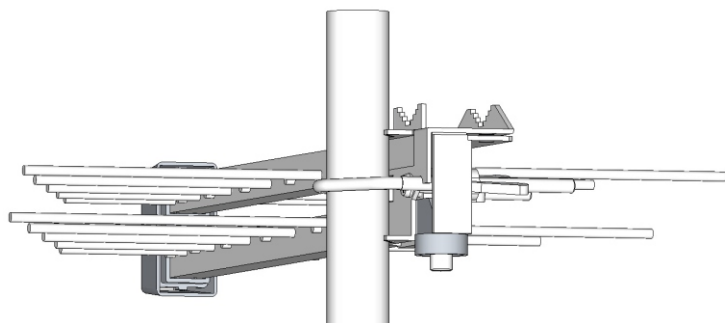

F female socket is moulded together with low loss copper cable in fully weather resistant rubber housing...

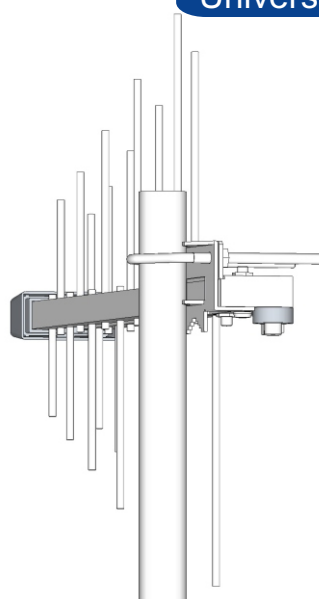

Simply twist F socket into the required position

Twistable F Socket

F female socket can be simply twisted into the required position without needing to disassemble the antenna, light-weight, weather resistant, reliable and solid aluminium construction is even more reinforced with universal mounting bracket.

Universal Bracket

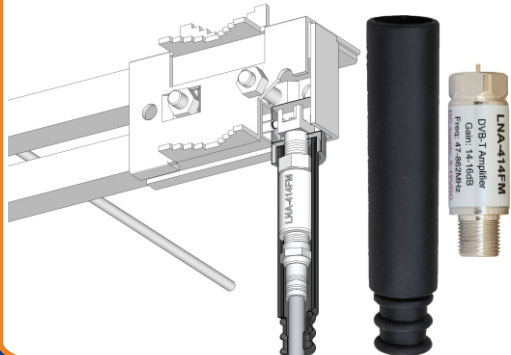

New Protection Boot

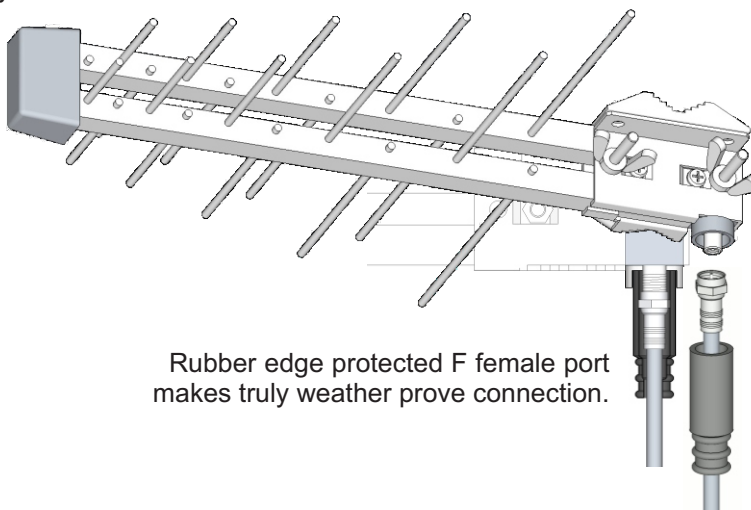

Condensation drainage holes on the newly designed rubber boot in conjunction with twistable, rubber edge protected F female port allows you to achieve a worry free connection in no time.

Optional Amplifier

Very easy to transform to active antenna with super mini amplifier and extended rubber boot (optional)

Worry Free Connection

Rubber edge protected F female port makes truly weather prove connection.
